DETAILED ACTION

Allowable Subject Matter

Claims 1, 2, 5-10, 13 and 14 are allowed.

Reasons for Allowance

Claims 1, 2, 5-10, 13 and 14 are allowed since there is no prior art of record that teaches or suggests a liquid crystal display (LCD) panel comprising a relationship of various elements as claimed with the specific allowable subject matter cited in the following claim:

Claim 1: the frame area comprises:

- plurality of color filters provided side-by-side on the second transparent substrate
- first electrode that counters the color filters
- second electrode counters the first electrode across a liquid crystal layer
- wherein the first electrode and the second electrode are connected to a common voltage
- wherein liquid crystal panel is a normally-black liquid crystal panel

Claims 2, 5-10, 13 and 14 are allowed since they depend on the allowed claim 1.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shimada et al (US 5,910,829) discloses color filters formed in display region and in frame region. Light blocking layer in frame region is formed of at least one of materials that are used for the plurality of color filters. There is no common electrode

(first electrode) on the first substrate and/or no auxiliary electrode (second electrode) on the second substrate provided in frame area.

Fujioka et al (US 6,552,764) discloses a liquid crystal display device with color filters formed in display region and in frame region similarly with Shimada et al LCD device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
